food security Background paper for The State of Agricultural Commodity Markets (SOCO) 2018 Thomas W. Hertel Mon, 29 Jun 2015 23:54:00 GMT Climate change, agricultural trade and global food security - Climate Change Impact on Agriculture and Costs of Adaptation International Food Policy Research Institute Washington, D.C. Updated October 2009 Gerald C. Nelson, Mark W. Rosegrant, Jawoo Koo, Richard Robertson, Timothy Sulser, Climate Change: Impact on Agriculture and Costs of Adaptation - Climate change and agriculture Agriculture both contributes to climate change and is affected by climate change. The EU needs to reduce its greenhouse-gas emissions from agriculture and adapt its food-production system to cope with climate change. Faced with growing global demand and competition for resources, the EU's food production and consumption need to be seen in a broader context, linking agriculture, energy, and food security. Agriculture and climate change - European Environment Agency -
